EDUCATION

Université de Genève <i>Master of Neuroscience</i> Inhibitory Trilingual Language Control Revealed by Intrusion and Reaction Time Patterns	Genève, Suisse June 2024 GPA: 5.22/6
University of South Carolina <i>Bachelor of Science (BS) in Neuroscience</i> Minor in Spanish	Columbia, South Carolina May 2024 GPA: 3.89/4.00
Institute for American Universities <i>Study Abroad</i>	Madrid, Spain January-May 2023

RESEARCH EXPERIENCE

Department of Fundamental Neurosciences: Université de Genève <i>Master's Student</i>	City, State September 2024-June 2026
• Researched theoretical background and designed experiment for Master's Thesis project. • Worked with multiple programming languages and websites such as Python, JavaScript, HTML, R, JATOS, and Open Sesame to implement behavioral experiment. • Regularly attended and presented updates on thesis project during lab meetings and contributed to Journal Club discussions. • Regularly attended interdisciplinary seminars and participated in discussions about the seminar content.	
Speech and Bilingualism Group: Basque Center on Brain, Cognition, and Language <i>Master's Intern</i>	Donostia, Spain July 2025
• Used Praat to analyze vocal onset time and vowel tone of 20 participants' audio files. • Created methods for automatization of file processing. • Assisted with EEG data collection and pre-processing. • Aided with eye-tracking and various behavioral task data collection. • Attended weekly group and department meetings.	
Center for the study of Aphasia Recovery: University of South Carolina <i>Undergraduate Researcher</i>	Columbia, South Carolina August 2023-May 2024
• Analyzed data using Core Lexicon Analysis and Main Concept Analysis of over 100 participants, with 6 different trials each, across two institutions. • Navigated R Studio for the Core Lexicon Analysis and downloaded the Main Concept Analysis software into R Studio. • Communicated with the Principle Investigator with updates of how the study progress is going • Participated in Laboratory orientation, training, and attended weekly lab meetings	
Neurodevelopmental Disorders Lab: University of South Carolina <i>Undergraduate Researcher</i>	Columbia, South Carolina June-August 2023
• Prepared mail-home survey evaluations for each participant and wrote cover letters to communicate with the parents of the participants. • Prepared evaluation folders for each participant • Analyzed and entered different tests into the scoring system such as the Bayley, Vineyard, AOSI, ADOS, SPA, and CSBS. • Entered data into the master file of each evaluation • Wrote evaluation and LENA reports for the families of the participants	

SELECTED PUBLICATIONS / PRESENTATIONS

Presentations:

Thille, M.; Slaats, S.; Hervais-Adelman, A. (September 29-October 2nd, 2026). *Trilingual Language Control - Exploring the Neural Basis of Interference and Control in MEG* [Poster Session]. Society for the Neurobiology of Language, Geneva, Switzerland. **Pending*

Thille, M.; Slaats, S.; Hervais-Adelman, A. (May 27-29th, 2026). *Inhibitory trilingual language control revealed by intrusions and reaction time pattern*[Poster Session]. Conference on Multilingualism, Toulouse, France.

Thille, M.; Slaats, S.; Hervais-Adelman, A. (May 4th, 2026). *Inhibitory trilingual language control revealed by intrusions and reaction time pattern*[Poster Session and Blitz presentation]. NeuroMaster Day, Geneva, Switzerland.

- Won Best 2nd year Blitz presentation

Thille, M.; Slaats, S.; Hervais-Adelman, A. (September 24-26th, 2025). *Effect of Proficiency on Trilingual Language Control*[Poster Session]. NeuFo Retreat, Divonne-les-Bains, France.

Thille, M.; Slaats, S.; Hervais-Adelman, A. (April 29th, 2025). *Effect of Proficiency on Trilingual Language Control*[Poster Session]. NeuroMaster Day, Geneva, Switzerland.

Publications:

Thille, M.; Slaats, S.; Hervais-Adelman, A. (2026). Trilingual language control – interference patterns in mixed ability speakers reveal a complex interaction between age of acquisition proficiency. **Pending*

PROFESSIONAL AFFILIATIONS

Université de Genève, Animatrice pour ateliers scientifiques	September 2024-June 2025
- Led workshops in various scientific topics in biology and neuroscience, such as Êtres Vivants, Stress, and Illusions in French, English, and Spanish. - Supported classes of up to 20 students varying in age from 9-19 years old. - Coordinated workshop logistics (materials, preparation, cleanup, timing) and assessed participants’ understanding and adjusted content in real time to maximize engagement and progress. - Promoted participation and critical thinking through active methods (guided questioning, teamwork, problem solving).	
Emory University, Emory Pipeline Collaborative Summer Mentor- Junior Cohort	May-June 2024
- Mentored 20 students in the Junior Cohort, supporting academic enrichment and college readiness. - Led sessions on healthcare careers, prerequisites, and application strategies; coordinated guest speakers and campus visits. - Supported SAT preparation and college applications, including resumes, cover letters, and personal statements.	
University of South Carolina, Supplemental Instruction Leader	August 2023-May 2024
- Assisted over 200 students with instruction in the Physics 211 course and hosted instructional and exam review sessions throughout the semester. - Prepared session plans for three one-hour supplementary instruction sessions every week as well as 4, 2-hour test review sessions throughout the semester, as well as providing review materials for all students to use (practice questions, mock exams, etc). - Led active-learning instruction (think-pair-share, guided practice, retrieval-based review) with students of various levels of understanding in sessions with up to 80 participants.	

SKILLS

DELFB2 Certification-French	Experience coding in JavaScript, Python, HTML, and R	EEG data collection
Conversational Spanish	Knowledge working with JATOS, OpenSesame, and Prolific	Tutoring experience

LANGUAGES

English- Native | French- Bilingual Proficiency | Spanish- Limited Working Proficiency
